DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3, line 11 and claim 4, line 11, a reference is made to "equations". However, the elements referred to, $|Dx2 - Dx1|$ and $|Dy2 - Dy1|$, appear to be algebraic expressions (the absolute value of the difference between $Dx2$ & $Dx1$ and the between $Dy2$ & $Dy1$, respectively). An "equation" requires a statement of equality between two different algebraic expressions.

Allowable Subject Matter

3. Claims 1-2 are allowed.

4. Claims 3-4, insofar as they are understood, would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2624

5. The following is a statement of reasons for the indication of allowable subject matter:

Re claim 1 (and dependent claims 2-4), the art of record does not teach or disclose the recited defining of a read mark and a write mark followed by operations of calculating the recited distance vector between their positions and another distance vector such that phase positions of the marks are equivalent in relation to a periodic pattern in conjunction with the recited copying of image data from the read mark location to the write mark location.
